

FCC Commission:

PLEASE consider this a statement of support for satellite radio companies-in my case-XM-to provide local content including traffic and weather. I pay for this service monthly because I choose to do so and the recent inclusion of local information has only made the service more valuable to me. I suggest the rejection of Petition 04-160 and further suggest the NAB get into the year 2004 and compete for customers by improving the quality of their content.
